[SEE HOW IT WORKS](#)

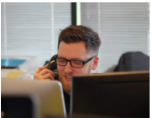

## QUALITY AND RELIABILITY MATTER

Welders are in short supply and keeping a trained welder in-house can be a headache. When you have lots of parts to push out, outsourcing your projects can give you the reliability you need, without sacrificing quality and deadlines.

## HOW TO GET YOUR METAL PARTS ON-TIME, EVERY TIME

At Arc & Gauge, we specialize in a sophisticated robotic welding process to manufacture the metal parts you need. If you are looking for one-off welding projects, we do that too, as our schedules allow. Please submit our [Custom Welding Quote Form](#) for smaller volume welding projects.

### REQUEST A PARTS QUOTE

Tell us about your parts needs. We'll help you find the best way to get it done. Approve a quote based on drawings or samples.

### PREPARE TO MANUFACTURE

We'll create fixtures, jigs, and templates to ensure that the parts are consistently made at a high level of quality and any volume.

### PRODUCE YOUR PARTS

Our robotic welding process will enable you to get the parts you need now, and scale up and create more later.

### SHIPPING & DELIVERY

Your timelines are mission critical, so we'll help you find the best way to get the parts to your door, even if we deliver it ourselves.

### EXPERIENCED WELDERS

Established in 2009, Arc and Gauge is an AWS certified company that has steadily grown over the years.

### SPECIALIZED SERVICES

In addition to standard orders, our in-house capabilities include tig welding, mig welding, experience with ferrous and non-ferrous metals, robotic welding, CNC machining, and fabrication to produce a high volume of metal parts with the consistency you need.
